PROFILE

JavaScript Web Developer with over 2 years of professional experience and a total of 4 years of work in the field

EXPERIENCE

Software Developer - SummIt Ltd.

Feb 2023 - Present

Projects

- **WorkisrOund -** a package of online tools, which automate the process of administrating the posting of workers process for organizations, which provide services within the EU. These tools are concerned with the posting rules identification, assignment letter document generation, posting of worker notification, and posting document storage aspects of the general posting of workers process

  - Designed and implemented frontend components for an administrative toolset, automating compliance processes within the EU.
  - Enhanced frontend architecture by updating outdated libraries (e.g., React, Bootstrap, React-Bootstrap) and integrating SASS for scalable styling.
  - Standardized notifications and implemented semantic HTML5 for better accessibility and adherence to web standards.
  - Rebuilt core application pages for better UX and seamless feature expansion.

- **Easy Payment Services – Incoming and Outgoing Payments -** project that leverages a robust internal core banking system, functioning as an API, to ensure seamless processing and integration. The platform is designed to support high efficiency and security by incorporating advanced integrations with Bisera6 for interbank payments and utilizing the BORICA API to handle card transactions with precision and reliability.

  - Refactoring and bug fixing
  - Modifying existing functionality
  - Updating website and applications interactivity
  - Consulting teams in regard to UI design and development
